

About the event:

The purpose of the Annual ETF Global Awards® Dinner and Workshop is to bring together industry participants from their respective markets to celebrate outstanding achievements and to provide a forum in which topics of common interest are discussed and new developments are shared.

It brings together leading index providers, product issuers, financial advisors, plan sponsors, asset managers, academia and institutional participants.

We value our audiences and are passionate about providing them with timely and educational content.

Delegates from the Europe, Asia, North America, Africa, Middle East Latin America and Australia have participated in the previous events.

The services we offer are of the best quality, with the highest standards of accuracy, independence and integrity.

We work closely with our sponsors to target their respective needs. This allows resources to be used effectively.

Please see our sponsor page for a list of organizations that have participated in the event.

Our conference is not just about learning, it is also an excellent opportunity to meet potential clients and generate new business relationships through our networking possibilities.
